

swimming for water.

Imagine Swimming teams up with charity: water to provide schools in Africa with clean, safe water.

about the project.

so far, Imagine Swimming has raised **\$6,375**, enough money to provide the Nakiliza School in the D.R. Congo with clean water and sanitation and begin the development at another school in Ethiopia.

The development and implementation of water projects in schools has the potential to increase enrollment for older girls, as lack of water and sanitation is the number one reason girls drop out in developing countries. with a water source close by, children will no longer have to walk the long distances to fetch dirty, unsafe water.
